

Aqua-Bric®

PERMEABLE PAVER

A uniquely designed permeable paver that allows water to infiltrate the pavement, reducing storm water runoff and recharging the ground water system.

- Meets EPA stormwater requirements with a superior solution
- Achieve significant savings through enhanced land planning
- Deliver maximum strength to handle vehicular traffic
- Produce remarkable curb appeal and convenient maintenance access
- Reduce Urban Heat Island Effect
- Aquabric is ADA compliant
- 50 year life cycle

Aqua-Bric® Permeable Paver

Enhance your property... and the world around it.

How we choose to manage stormwater runoff today will affect the delicate ecosystems in our lakes, rivers, streams and bays for years to come. In an effort to preserve and replenish our precious resources, Belgard introduces our line of environmentally responsible pavers. With its unique design, Aqua-Bric can achieve ADA compliance while promoting groundwater recharge through infiltration. Permeable pavement design does not have to sacrifice aesthetics to provide a functional and environmentally friendly, pervious surface.

Benefits of PICP Systems

- Reduces storm water volume and peak flows via infiltration
- Filters total suspended solids, nutrients and metals from storm water runoff
- Reduces runoff temperature
- Imitates predevelopment conditions
- Reduces or eliminates retention/detention facilities
- Maintains dry weather stream flows
- Promotes ground water recharge
- Reduces downstream erosion and preserves existing systems
- Reduces Urban Heat Island Effect
